

## Commissioning

- Fit the wall back to the wall with the supplied screws (C).
  - Fit the bulbs as per the instructions below.
- .....
- Refit the cover with the screws set aside earlier.
  - Replace fuse or circuit breaker and switch on. Your light is now ready for use.
- .....

## Fitting/replacing bulbs

- When changing a bulb, always switch off at the mains and allow the bulb to cool before handling. Dispose of used bulbs carefully. Do not exceed the wattage stated or use a different shape bulb from that indicated on the fitting.
- .....

- Use a soft cloth to handle bulbs, avoid directly touching the bulbs as this will shorten their life.

## Care and Cleaning

Do not use solvents or abrasive cleaners as these could damage the finish.

In normal circumstances, this product finish is very resistant to corrosion. It does however require maintenance to preserve the high quality appearance. Wash the product with warm soapy water, removing all surface deposits. Rinse with clear water and with a soft cloth, wipe dry.

In some cases, surface corrosion may arise after installation. This is normally caused by tiny iron particles left behind after the brushing process when finishing.

Wash and dry as detailed above. Then with a soft cloth

soaked with a protective oil, wipe all over. However if the product is subject to extreme environmental conditions such as marine locations, industrial pollution and acid rain these maintenance procedures should be carried out around four times a year. For severe corrosion, non-abrasive cream cleaners or proprietary stainless steel cleaners should be used to remove the corrosion. Wash and dry as detailed above. Then with a soft cloth soaked with a protective oil, wipe all over.

**Do not clean the units with a pressure washer.**

## Recycling advice

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

## Safety information

For your safety, always switch off the supply before changing lightbulbs, or cleaning.

This bulb is protected by a glass shade. This part must be replaced immediately should the glass shade become cracked or damaged. This fitting must not be used without the glass shade in place.

lighting

CE

Thank you for purchasing this light fitting. Please read the instructions carefully before use to ensure safe and satisfactory operation of this product. Please retain these instructions for future reference.

## Warning

**This light fitting is Class 1 and must be connected to an Earth circuit**

Please read these instructions carefully before commencing any work.

This unit must be fitted by a competent and qualified electrician.

Install in accordance with IEE Wiring regulations and current Building Regulations.

To prevent electrocution switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge. If you are in any doubt, please consult a qualified electrician.

This light fitting should be connected to a circuit with a 30mA RCD fitted.

If replacing an existing fitting, make a careful note of the connections.

Always use the correct type and wattage bulb. Never

exceed the wattage stated.

When changing a bulb, always switch off at the mains and allow the old bulb to cool down before handling. Dispose of used bulbs carefully and responsibly.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your local authority or retailer for recycling advice.

This product is rated at IP44.

This product is not suitable for location in or near a marine or sea environment.

The entire unit gets hot whilst on for a period of time.

## Specification

Voltage: 240V 50Hz a.c.

Lamp: 2 x 35W GU10 halogen

IP rating: 44

## Layout

- We recommend that you use H05RN-F specification cable (not supplied) which is an outdoor grade, rubber sheathed cable. The mains supply cable must have a minimum cross sectional area of 1.0mm<sup>2</sup>
- Cables must be protected using suitable conduit or plastic trunking.

## Installation

Existing fittings must be completely removed before installation of a new product. Before removing the existing fitting, **carefully note the position of each set of wires**.

- Detach wall back (B) from the product by removing the screws (A). Keep safe for refitting later.
- Using the wall back as a template, mark the position of the fixing holes. Drill the holes. Ensure the wall is capable of holding the weight of the product. Take care to avoid damaging any concealed wiring and pipes. The correct fixings should be used for brick

or cavity walls. Make sure the wall back is correctly oriented as shown here:-

- Wire as detailed below

## Wiring

Having correctly identified the wiring from your existing light fitting, remove the cover from the terminal box and

connect to the product in the following way:

## Check that...

- You have correctly identified the wires.
- The connections are tight.
- No loose strands have been left out of the connection block and the lid is refitted securely to terminal box.
