OVERVIEW

The versatility and simplicity of these ceiling lights makes them the perfect solution where a cost effective solution is more important than design. The comprehensive range is created with an acrylic white diffuser mounted onto a white metal plate. The diameters of the fixture range from 25cm to a most impressive 77cm with LEDs that give a 3000K light output. Included in the range is also a 55cm version with features built in to provide a bespoke and flexible solution. It is supplied with a remote control that allows complete adjustment of the light output. The colour temperature can be changed to anything between 3000K and 6500K whilst having the option to also be dimmed and a night light option. The diffuser on this item is flat compared to the curved version on the other fixtures within the range. Zero is a universal product in both design and functionality. All Mantra LED products carry a 3 year warranty.
