OVERVIEW

Tiffany is most definitely a rare and grandeur lighting collection with an extensive range of products. It combines E27 or E14 lamp holders on the upper level which are accompanied by discreet G9 lamp holders that are housed at the lower level within each tube below. This ingenious concept directly enhances the sparkle of its crystal carvings, as well as illuminating the surfaces below. The angled tubes are a fascinating design followed by the crystal strands creating a cascade of luxurious colour. The full collection is available in either polished chrome with white shades, antique brass with a bespoke soft bronze colour shade or an exquisite French gold with cream shades. With the option to choose the alternative colour shade creates the flexibility to design the perfect solution. Tiffany is prestigious range of lighting that redefines elegance.
