OVERVIEW

The use of sculpted asymmetric shapes for furniture, artwork and home accessories is a home décor trend that is sweeping the European market. As experienced lighting designers with a history in marketing, Spanish designers Santolaria and Llusca have utilised the popularity of this craze with the creation of the Asimetric range. The ultra modern asymmetric rhombus shape has been sculpted to enable the user to fit the wall light at any angle to throw shapes and shadows as desired, reflecting the asymmetry of the light itself. The metal framework hosts a GX53 fixture and is available in a complete white colour finish or a unique black finish with a stunning gold interior. For a more symmetrical option this range also offers a straight curved circular wall lamp in a white finish.
