OVERVIEW

An anarchic distribution of light points structured to mimic DNA strands in an artistic and visually balanced way, the Adn collection offers a comprehensive selection of lighting solutions to add character to your room setting. The round pendants are available in two sizes, along with a linear pendant option, Adn includes a table lamp, floor lamp and four different wall lamps. Each framework is coated in white epoxy to perfectly complement the warm light emitted from the 3000K LED's. In an ever changing market in which LED lighting is becoming more prominent and in high demand, the LED heads are individually diffused providing the possibility to change the integral LED's at the point of light source, if this becomes necessary in the future. This feature offers the consumer added comfort and security knowing they are able to self maintain their LED product for years to come.
